SANBORN-CUTTING COMPANY

PACKERS OF
SALMON

ASTORIA, OREGON

December 21, 1918.

H. M. Smith,
U S Commissioner of Fisheries,
Washington, D. C.

Dear Sir:

We return herewith report giving statistics covering our plant at Kake, Alaska.

You will note that on line four we have given value of our entire properties at this location, as appraised during the past summer by the General Appraisal Company of Seattle and San Francisco. This figure includes value of floating property, and we have therefore listed launches, scows, skiffs, traps and seines in following schedules in the report at values shown in appraisal, making notation at the foot of each schedule that value of properties listed is also included in total value shown on line four.

As to "cost of operations", line five, we have been obliged to leave this blank as we will not know what the cost of operation was until we have completed the closing of our 1918 books, which will be some time after the first of the year. Kindly let us know whether to forward this information later, or whether report will be returned to us to have this information added as soon as available.

Yours respectfully,

SANBORN-CUTTING CO.
